RRD Toxic Wave2

Toxic combines a surfboard outline with the advantages of twin-tip driving. You can even ride backwards to come through the line up although you will go on a rounded rail and a lifted nose. The perfect choice for onshore conditions. The board has another construction technology, a different out and rocker line and is suitable for light wind and small waves. A reliable name and proven performance with a new concept.

Technology: Massiv wood / Biaxial / ABS side walls / DC / DC
