NBK Evo 2010 - kite only

The perfect cross over weapon between freeride and newschool freestyle.

The Evo 2010 has got a wide performance potential that meets the needs of the most kite drivers. It has a super robust shape, soft and predictable flight attributes and an unbelievable response at the bar analogue to a c-kite. You just have to hang it out and try the latest new school maneuver with a starkly pop. Precise kite loops invite you to check out all the radiuses and loops versions.

The fantastic low end will bring you to an early slide even with a little flurry. With the auto relaunch, the Evo will be back in zenith within seconds. Simply drop the bar - the kite will do the job for you.

New relaunch bungees avoid that the leashes will slip over the wing tips during the restart. Many more construction details prevent from hard wasting and cracks at the stress points. All Evos can be used with four or five leashes depending on your personal preferences. The Evo became more comfortable then ever.

Attributes:

- freeride / wave orientation
- loaded 5th leash concept
- short and direct power stroke
- floating center strut
- v-back leashes system with integrated relaunch bungees

- directly and quickly forced steering commands, esp. when depowered
- low drag design

Purchased parts package:

- Kite
- Bag
- Repair-Kit
